A

A common raised bumps on the skin. Contagious, and can appear on any part of the body.

B

Itchy welts that are raised up from the normal layer of the skin. May be caused by an allergic reaction in the body or outside factors.

C

One of the most widespread skin conditions. Comes in many forms. Usually caused by infected hair follicles.

D

There are a few different types. Rashes are itchy and may become bumpy, change color, or thicken.

E

Skin feels warm or hot to the touch. Severe cases can cause headache, fever, nausea and fatigue.
